SUMMARY

Data analyst with a Computer Science background and 7+ years of experience turning marketing, customer, product, and web data into automated reporting, campaign insights, and measurable business outcomes. Strong SQL, Google Analytics, Salesforce Marketing Cloud, REST API, Excel, HTML/CSS, JavaScript, and Azure experience; known for partnering with Product, Data, Marketing, and Operations stakeholders to define metrics, improve data quality, and translate analysis into execution.

EXPERIENCE

Marketing Data Analyst / Email Marketing Manager, Nationwide Pet Insurance Jun 2019 - Present

- Built and executed lifecycle campaign analysis in Salesforce Marketing Cloud, using segmentation, dynamic content, A/B tests, and multivariate tests to raise engagement 15% and reduce churn 10%.
- Defined audience, engagement, churn, and journey-performance metrics with Product, Data, and Marketing teams, translating campaign results into optimization recommendations for customer journeys and product launches.
- Developed responsive HTML/CSS and AMPscript email assets with strong QA, accessibility, and deliverability controls, improving reliability across devices while supporting data-driven personalization.
- Analyzed campaign performance in Google Analytics and Salesforce Marketing Cloud reporting, identifying opportunities to improve targeting, content, send timing, and retention outcomes.

SaaS Developer / Data Automation Analyst, JVC Kenwood USA Corp. Oct 2017 - Jan 2019

- Developed and maintained internal web applications using ReactJS, ASP.NET, SQL, and Azure to support marketing automation, analytics tools, and stakeholder reporting needs.
- Built REST API integrations and SQL-backed workflows that enabled personalized, data-driven email campaigns and increased targeted reach by 20%.
- Collaborated with cross-functional product and marketing stakeholders to deliver analytics-enabled features that improved campaign performance and user engagement by 17%.
- Maintained application data flows and reporting logic, improving consistency between customer data, campaign systems, and internal dashboards.

Web Developer / Reporting Automation Analyst, Virtual Graffiti Jun 2016 - Oct 2017

- Automated marketing workflows and integrated analytics tooling, improving campaign reporting speed by 30% and giving teams faster visibility into performance trends.
- Designed and deployed responsive web assets, landing pages, and email templates using .NET Core, JavaScript, and SQL Server while maintaining accessibility and brand consistency.
- Partnered with designers, marketers, and business stakeholders to launch conversion-focused pages and support product-led growth initiatives.

PROJECTS

Lead Project Associate - E-commerce Analytics, Smart PetBrush Apr 2019 - Jun 2019

- Launched and optimized Shopify e-commerce stores, using segmentation and personalized messaging to drive a 35% increase in customer engagement.
- Integrated analytics and reporting solutions to measure campaign effectiveness, inform merchandising and lifecycle strategy, and increase repeat purchases by 12%.
